

SnapPoll

Quickly create a poll and gather opinions

SnapPoll allows you to ask one multiple choice question to all users in your organisation, right on the KPMG Fulcrum landing page.

Easy to create

Create your poll and publish it in a matter of minutes

Easy to complete

Decide how you want your respondents to answer your questions. Use a range of pre-built options or customise the answer type as you build your poll.

Participants can choose from among answers that you predefine. You can allow voters to select just one answer or allow them to choose multiple answers.

Work as a team

You can decide whether you want to set others in your company up as administrators so that they can help you build your poll or to help with the analysis once the poll has been closed.

Easily Accessible

Your poll is displayed on your organisation's landing page on KPMG Fulcrum. All staff in your organisation will see it when they log in.

Analyse Results

Responses can be analysed using our online interface or you could export the raw data for analysis in your favourite tool.

The power of Fulcrum

Every person in your organisation who accesses KPMG Fulcrum will see your poll on your organisation's landing page. You don't have to send out additional emails or host anything in a different environment. We have every user covered – even those employees who only joined your organisation yesterday!

Integrated Messaging

You can leverage the integrated messaging system to quickly and easily invite your employees to see and take your poll.

Secure

Your polls and their results are secure at all times. The robust security of KPMG Fulcrum ensures that everything is encrypted and only those people who you choose are able to access the result
