SnapPoll+

Live, Interactive Polls

Engage your audience in real time

Easy to create
Create the polls for your event and publish in a matter of minutes. You'll be up and running for your event in no time at all!

Easy to complete
Decide how you want your respondents to answer your questions. Use a range of pre-built options or customise the answer type as you build your poll.

Participants can choose from among answers that you predefine. You can allow voters to select just one answer or allow them to choose multiple answers.

Easily Accessible
Participants can access and complete the polls on the device of their choosing. It works equally well on tablets, smartphones and personal computers.

Live Timing, Live Results
Set the time limit in which participants can provide responses and then display the results live during your presentation. It's a great way to stimulate conversation and enhance audience participation.

The power of Fulcrum
Every person at your event can register to use the webapp so you can draw interesting insights from the audience composition. You also have a list of all attendees for later reference.

Integrated with Fulcrum
If you're running an internal event all your employees who are registered on KPMG Fulcrum will have immediate access to the poll so they don't need to register just for the event.

Secure
Your polls and their results are secure at all times. The robust security of KPMG Fulcrum ensures that everything is encrypted and only those people who you choose are able to access the result

Analyse
Results from your event are stored permanently on KPMG Fulcrum so you can access them after your event for further analysis and reporting.
