

StaffBook

An instant photo and contact directory of all personnel

Using the employee data stored in KPMG Fulcrum, you have immediate access to a photo-directory of employees. This makes it convenient for all employees to quickly search for and contact each other.

Basic Search

You're able to quickly search for a user if you know their first or last names and get access to their full profile.

Trace unknown numbers

If you have a missed call from a number you don't recognise but you think it may be from a person in your organisation, type it into the Contact Number search field and find the caller.

Advanced Search

In addition to the basic search features, you can search for all registered users across your organisation who work in a specific business unit or office – or by staff level.

Need skills – find them here

If your staff have captured skills and experience you can quickly find people who have the skills you need using the advanced search feature.

It's a popularity contest

The word cloud on the home page shows you the top 10 most common search criteria used by people in your company. Can you get your name on there and keep it there?

A companion app for iOS and Windows Devices is also available on request.

All the information you need

Search results display a wide array of information on users. This information includes:

- Photograph
- Name and Job Title
- Department and Office
- Contact Details (email and phone)
- Skills and experience

Where a user has an assistant, you'll even see the assistant's details.

Privacy assured

Information stored on StaffBook is only available to people in your company, helping to protect personal information. There are no downloadable lists so people can't get a complete listing of all staff for dishonest purposes.

The integrated security on user profiles also helps to protect personal information in that users can define for themselves what information they want shown about them on KPMG Fulcrum.
